*Legend: N = never, I = infrequently, S = sometimes, FO = fairly often, A = always*  
*At the end, sum up the totals in each column and multiply them by the multiplying factor before writing them at the bottom. For example, if you have 8 checks in the "Always" column, you would multiply that by 4 to get a value of 32 that you would then write in the "Column Subtotal"*

**If the total score is greater than or equal to 16, this warrants a specialized binocular vision evaluation with a developmental optometrist**
